Description

Music Artists

Your music is already fire. Your visuals should be too.

Monopoly Boy Agency builds visual universes for artists that go beyond just cover art. We create characters, worlds, and digital campaigns that turn every release into a moment—and every moment into fans, streams, and sales.

Why Artists Choose Us

- **Strong visual identity** so your releases look connected, not random
- **Character-based campaigns** that live across covers, social, live shows & merch
- **Visual storytelling** that matches your sound, not a generic template
- **Release strategies** built for how fans actually discover music today

We plug into your label team or work directly with you and your management.
